

A Unique Selection

HARMONY AUSTRALIAN COLLECTION

Australia has claim to some of the most unique and durable hardwoods found anywhere in the world. Harmony now offers these timbers to you in a range that captures and accentuates the natural character and beauty of our native species.

Aesthetically stunning and naturally durable Australian species are fast becoming the key choice for designers and architects wishing to give their projects a unique edge.

From the light modern tones of **Tassie Oak** and **Blackbutt** through to the traditional warmth of **Spotted Gum** and **Blue Gum** this is a range that will fit perfectly into your Aussie home.

Harmony is revolutionising the way we think of timber floors. Our pre-finished lacquer system allows for a far quicker installation process avoiding lost productivity and eliminating the inconvenience associated with more traditional flooring options. Our cross-laminated hardwood ply construction produces a board that is both superior in stability and durability and tough enough to withstand the environmental pressure placed on them. Our 4mm hardwood veneers/lamella are sawn not rotary to produce a floor that not only looks great but will truly last a life time. In our Australian range we have source a cross section of species that reflect the character of our unique country.

SPECIES RANGE

Tassie Oak: A blend of three eucalyptus varieties Tassie oak offers a modern palette ranging from pale straw to light browns and hints of pink.

Blackbutt: An extremely durable and stable timber Blackbutt is renowned for its unique shades of golden browns and warm pinks.

Spotted Gum: An aesthetically stunning timber offering greys and browns with hints of red sapwood. A must for anyone seeking a truly traditional floor.

Blue Gum: The warmth and character of blue gum is undeniable. A glorious timber with rich red hues that would find a place in almost any setting.
