

# A Popular Alternative

## HARMONY TIMBER WALK LAMINATE FLOOR COLLECTION

Laminate floors are fast becoming a popular alternative over traditional floor coverings such as carpet and tiles. Laminate floors retain the look and feel of hardwood floors as well as many of their physical properties but at a fraction of the cost.

Using only the highest grade HDF board **Harmony Timber Walk Laminates** are manufactured to the strictest European standards producing a floor that not only looks and feel great but with the durability to withstand the toughest environmental conditions.

**Harmony Timber Walk Laminates** are 12.3mm thick and are coated with our unique moisture block system making them the leader in the industry for quality and feel. Our U-mould joint system also gives **Harmony Timber Walk Laminate** floors a look that mimics more accurately the aesthetics of a traditional timber floor.

**Harmony Timber Walk Laminate** floors come in wide variety of colours, profiles and finishes and are a must when considering a flooring option for your next project.

Harmony is revolutionising the way we think of laminate floors. Our laminates use a variety of unique technological breakthroughs all combined in one board to create a product that is truly an industry leader. Harmony begins by using only the highest grade HDF board this is then covered in our unique Moisture Block coating system which results in a board that will absorb far less moisture than any on the market. Next we take the highest grade German papers to create a look that mimics the beauty of natural timber. These are then finished using one of our three unique coating systems and pressed using our U-mould technology to create a board that will not only add beauty to your home but will stand the test of time.

## COATING RANGE

**Timber Touch:** An embossing system that mimics the feel of traditional timber by creating grain effects in the surface of the board. Made to the highest standards our Timber Touch boards come with an AC3 rating and are compatible with our Moisture Block system.

**Liquid Crystal:** A unique high-gloss finish that aims to mimic the characteristics of a traditional, polished timber floor. Liquid Crystal will accentuate the natural beauty of your floor creating a finish of exceptional splendour and class.

**Hand Sculpt:** A finishing process that aims to mimic the aged beauty of traditional hardwood floors producing a laminate with exceptional character and charm. Made to the highest standards our Hand Sculpt boards come with an AC3 rating and are compatible with our Moisture Block system.

## FEATURES AND BENEFITS

- High Density Board for superior strength and stability.
- Unique 3 finish coating system.
- Moisture Block System for superior protection against spills and leaks.
- Patented locking system for glue free installation.
- Highest AC3 surface wear European rating.
- U-molded profile for a more traditional finish.
- 12.3mm thick suitable for residential and commercial applications.
- Eco-friendly low immersion material construction.
- Wide board profile for modern aesthetics.
- Non-allergenic for cleaner more healthy environment
- Can be installed over almost any level substrate including concrete, particle boards, plywood and existing floors such as tiles or cork.
- Can be walked on immediately post installation removing down time and inconvenience.
- Genuine timber look and feel.

## SPECIFICATIONS

<b>Width</b>	120-180mm
<b>Thickness</b>	12.3 mm
<b>Length</b>	1230mm (RL)
<b>Surface</b>	Three finish option with AC3 rating
<b>Construction</b>	4 layer with HDF Core
<b>Edges</b>	U-molded for four sides with unilin click
<b>Installation</b>	Dual installation with direct stick and floated application over almost all substrates

## WHAT IS MOISTURE BLOCK

**Moisture Block is a unique coating system applied to our Timber Walk laminate floors to give them a high level of water resistance's making them impervious to water encountered in everyday use such as spills and mopping. During the manufacturing process our HDF board is coated 3 times in a wax resin sealing the fibres and creating a water resistant barrier. This barrier means you can safely install Harmony Timber Walk Laminate in areas such as Kitchens and Bars where traditional laminates would have failed. Due to our unique Moisture Block you can be assured that Harmony Timber Walk Laminates will not swell, shrink or buckle and will handle even the toughest environments.**

- Top layer available in three unique finishes Timber Touch, Liquid Crystal, Hand Sculpt all with AC3 rating.
- Unique species selection, utilising the highest quality German decorative papers.
- HDF core with low emissions and high stability
- Unique core coating system to reduce the uptake of moisture and protect against spills and leak.
- U-mould pressed edge to create four sided bevel, the most aesthetically pleasing board on the market.
- Unilin patented click lock double joint system for a superior hold and glue less application.
- Rubberised Backing layer to reduce sound transfer and moisture uptake.

- **Custom Wear layer**
- **Decorative Layer**
- **Eco-Core**
- **Moisture Block**
- **Edge**
- **Tongue and Groove**
- **Backing layer**
