Water Proof

Lafayette SPC flooring features an entirely waterproof core. You can lay it in areas of the home where hardwood and other moisture-sensitive flooring types are not typically recommended, such as laundry rooms, basements, bathrooms, and kitchens.

Durability

Lafayette SPC flooring is resistant to scratches and stains. It holds up well to wear and tear even in high-traffic areas of the home. If you're concerned about durability, 7mm Lafayette rigid planks are the answer.

Easy Installation

Lafayette SPC flooring is made to be installed on top of just about any type of subfloor or existing floor as long as it's flat and sound. You won't have to deal with messy glues since the planks easily attach to one another to lock into place.

Eco-friendly

Not only is it formaldehyde-free, but there is no plasticiser inside.

Stability

The thick and dense core makes it more resistant to expanding and contracting from moisture exposure and extreme temperature fluctuations.

Sound Insulation

The thicker core of Lafayette SPC Flooring makes it superior when it comes to sound insulation. The thickness helps to absorb the sound, so it's quieter when walking on these floors.

Foot Feel

With a 7mm thickness, it feels more stable and cushioned when walking on it. That thickness also helps to provide insulation to keep the floors warmer.

The next level of SPC Flooring

Beautiful, durable and affordable. With the ingenuity of German technology, the Lafayette SPC flooring installation now becomes much easier than ever.

Lafayette Herringbone SPC Flooring

Lafayette is inspired by the herringbone design of European traditional solid wood flooring and western decoration aesthetics, besides, Lafayette patterns design is also based on real Australian and European oaks with Neutral color tone and fine grain texture.

“Back to Nature” has been always the global aesthetic criteria in the flooring industry. Except for the pursuit of real wood effect, customers also have high standards for waterproof and scratch-resistant performance to flooring products, therefore, vinyl floors, especially HYBRID SPC, is chosen to be the flooring Of choice. Lafayette vinyl flooring is beautiful but also functional due to its waterproof properties as well as ultra scratch and stain resistance . Additionally, optional IXPE backing can be attached under the flooring to achieve acoustic reduction, whilst the flooring can be also directly installed on any kinds of existing sub-floors.
