

HARMONY
TIMBER FLOORS

HAYMAN ISLAND RESORT

To create the ultimate in beachside luxury accommodation with floors that would complement the modern furniture while still offering warmth and durability and affordability.

The Harmony Heritage range was a perfect Choice it has a solid 4mm Lamella European Oak top which is bonded on to a hardwood ply base, and ideal product for the location and for the project. The floor had to blend in with the natural Travertine stone used as feature walls and tiles both in the open bathroom and living areas.

We had to take into account the high level of humidity, and high temperatures reached in this area: we needed a floor that was Durable, Attractive, Modern, easy to maintain and most importantly dimensionally stable.
